1 Formal CPD Point

CPD LIVE

Free CPD education online

This CPD seminar entitles you to 1 formal CPD point. Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

SUSTAINING THE FLOW – WATER FOR THE FUTURE

Proudly supported by

PHOENIX TAPWARE, SHOWERS & ACCESSORIES

1. When planning a project, how do you evaluate which products are best for the design, sustainability and aesthetics in a kitchen and bathroom?
2. What new technologies can help save water and provide efficiencies in areas such as the kitchen and bathroom?
3. Explain the idea of water conservation and how it can be achieved in a residential design.
4. Explain the standards and regulations such as the WELL Building Standard that need to be met with specifying products.
5. When designing a residence which other experts should be involved when dealing with aspects such as water use.

At the end of this panel, attendees will be able to:

a) Explain the concept of water conservation and how it applies to residential projects

b) List the critical issues/points of water efficiency and which products can help achieve optimum results

c) Identify the technology that can help to address the conservation of water

d) Outline the WELS Standard and what this means when specifying products

e) Define what is possible to achieve to conserve water through good design

AACA Competency Codes: Documentation: Detailed Design 5.3, 5.4, 5.5, 6.5
